PRIMA Objectives Prioritization Survey

INTRODUCTION

17%

The objective of this PRIMA Online Questionnaire is to collect the opinions of key actors on the research priorities to be addressed by the PRIMA initiative (www.prima4med.org), both in terms of objectives and topics, as well as suggesting which actions you would like the PRIMA Initiative will primarily develop within each of the three PRIMA thematic pillars.

The PRIMA Strategic Innovation and Research Agenda will promote a balanced mix of innovation actions that contribute to overcoming the main bottlenecks towards adoption of innovative solutions for improving efficiency and sustainability of food productions and water provision in the Med Area.

The actions to be carried out within PRIMA will boost the innovation potential of the Euro-Mediterranean agri-food chains by: addressing close to the market innovation activities; stimulating local entrepreneurship capacities; increasing participation of industry/SMEs.

The replies submitted to this survey will be analysed, aggregated and taken into consideration during the development of the PRIMA SRIA foreseen for May 2017.
